Computer Science student at BUAP (GPA 9.18/10) with hands-on experience taking software from design through production. I won the FEPRO 2026 Industry Challenge leading the development team for an access-control system, and I built the HR management system Museo Amparo uses today.

Technical Skills

- Python, Django, Go, SQL/PostgreSQL, REST APIs, Git, Linux, version control, access control and user authentication

Soft Skills

- Leading technical teams under time pressure, documentation and knowledge transfer, ownership and follow-through when working with a regular team check-in cadence, adapting quickly to new tools and contexts

Professional Experience

- **Museo Amparo** **Puebla, Mexico**
Software Developer (Social Service) *Jan 2026-Jul 2026*
 - Designed and built the museum's HR management system from scratch, now used daily by its HR department
 - Built a self-service portal so employees could handle requests that used to be manual, speeding up the process
 - Documented the whole system so the IT team could maintain it without depending on me

Featured Projects

- **BUAP × Kigo Industry Challenge** **Puebla, Mexico**
AUTO-nomía – FEPRO 2026 winner *2026*

A visitor self check-in system for gated communities (kiosk + mobile apps), built to cut wait times at guard booths and make access control more secure. I led the backend development team (5 people) and we won the challenge.
- **Participant**
Me alcanza – HackMTY 2026, Banorte track *2026*

A conversational assistant that tells you whether you can afford a purchase and offers to set up an automatic savings plan with one tap, to make everyday financial decisions without manual math.

Education

- **BUAP** **Puebla, Mexico**
B.Sc. in Computer Science *2022-2027*

In progress, expected 2027. GPA 9.18/10.

Languages

- Spanish (native), English (B2).

Honors and Awards

- FEPRO 2026 (winner) · HackMTY 2026, Banorte track (participant) · Cocotrón 2023 (participant) · ICPC Mexico Grand Prix (participant)
